BOEDEKER PLASTICS RoHS COMPLIANCE STATEMENT

The European Union has passed the Restriction of Hazardous Substances in Electrical and Electronic Equipment (RoHS) Directive into law. Effective July 1, 2006, the RoHS Directive (2002/95/EC) will ban the sale of all new electrical and electronic equipment that contains more than designated maximum allowable levels of lead, cadmium, mercury, hexavalent chromium, polybrominated biphenyl (PBB) and polybrominated diphenyl ether (PBDE) flame retardants.

Boedeker Plastics is an independent distributor of plastic materials in pre-molded stock shape forms. To the best of our knowledge, plastic materials that we sell do not contain any chemical of concern above the limits designated in the RoHS Directive as described above or its amendments.

As a distributor, Boedeker Plastics does not formulate or manufacture any of the materials that we sell. Chemicals contained in the materials or used in the manufacturing of the materials are selected and used at the sole discretion of the manufacturer and in many cases will be considered intellectual property. Accordingly, we are unable to represent or certify to our customers the exact ingredients that are contained in or used in the manufacturing processes of the materials we provide for resale. Any certification of chemical content is the sole responsibility of the manufacturer.

Boedeker Plastics is aware of the EU RoHS compliance deadline of July 1, 2006 and is presently gathering information from the manufacturers of the products that we distribute. We are asking for RoHS statements from each of our manufacturers regarding their products and compliance to RoHS limits. We will use our best efforts to gather this information and communicate it to our customers. Information may include product status, dates of product compliance and data that may be available from each respective manufacturer about their products to document their compliance.

We can and do hereby certify that Boedeker Plastics does not add any of the RoHS restricted materials during its cutting, shaping, forming, storage or handling processes.

Manufacturers' RoHS compliance information provided by Boedeker Plastics to our customers is intended only as research assistance so that they may complete their due diligence. It does not represent in any way a certification by Boedeker Plastics as to the chemical content of any product. This information is passed on in good faith and is given without responsibility or liability.

If you have additional questions concerning Boedeker Plastics' position on RoHS compliance, or any of the plastic materials that you purchase from our company, please contact us by phone at 361-594-2941 or by e-mail to bpi@boedeker.com.

Sincerely,

Marvin Boedeker
